## SUMMARY

---

Results-oriented frontend developer proficient in React and modern JavaScript, pursuing full-stack expertise with a focus on performance and scalability. Expanding cloud and MERN stack skills while strengthening DSA fundamentals in C++.

## PROJECTS

---

### JNTUH Exams Papers Archive

[Link to Demo](#)

Developed a full-stack web application using React.js, Node.js, Express.js, and MongoDB, deployed on Render, for archiving and accessing JNTUH examination papers. Implemented robust filtering capabilities by branch, semester, subject, and regulation to enhance user experience. Secured the application with admin-only email verification using Nodemailer, ensuring data authenticity.

### Genie-AI: Personalized AI Chat Assistant

[Link to Demo](#)

Developed a smart AI chatbot featuring secure JWT authentication, persistent chat history, and integrated productivity tools including a caption maker, translator, thumbnail creator, and script generator. Successfully integrated external APIs (Grok, Google) and a payment gateway to facilitate premium features. Leveraged a robust tech stack encompassing React.js, Node.js, Express.js, MongoDB, and RESTful API design for efficient and secure application development.

## ACHIEVEMENTS

---

### Data Science Club, JNTUH – Buildathon Runner-Up

Oct 2024

Earned second place in the JNTUH Data Science Club's Campus Chatbot Buildathon, outcompeting numerous teams with a collaboratively developed chatbot addressing academic, event, and administrative inquiries.
